

**USER-DISSATISFACTION-BASED
STATIC BIKE REPOSITIONING:
FORMULATIONS, SOLUTION
METHODS, AND EXTENSIONS TO
BROKEN BIKES AND ON-SITE
REPAIR**

Runqiu Hu

Ph.D. Thesis

The University of Hong Kong

June, 2026

Abstract of thesis entitled

**“User-Dissatisfaction-Based Static Bike
Repositioning: Formulations, Solution Methods,
and Extensions to Broken Bikes and On-Site
Repair”**

Submitted by

Runqiu Hu

for the degree of Doctor of Philosophy

at The University of Hong Kong

in June, 2026

Put Your *Abstract* Here ...

This latex project is a doctoral thesis template for the University of Hong Kong. The style and design of the entire project closely follow the official guidelines from the Graduate School: **Preparing and Submitting Your Thesis — A Guide for MPhil and PhD Students**. Generally, there is no strict stipulations on the style or format of different components of the thesis, except for the **Abstract**. According to the detailed regulations [[Link](#)], the **Abstract** should be part of the thesis with no fewer than 200 and no more than 500 words. The format shall be the same as that of the thesis itself. The front page of each abstract shall contain the statement which includes:

- Abstract of thesis entitled “.....”
- Submitted by
- for the degree of
- at The University of Hong Kong in (June 17, 2026).

In addition to the opening of abstract, the abstract should appear before the title page. The abstract in this template is not numbered, or counted in

the pagination of the front matter, or listed in the table of contents. All the requirements are fulfilled in this template.

How to adjust the typeset of Abstract

The typeset of the opening of abstract page is defined in the class file `HKUThesis.cls`

Line 507-529. Users can adjust the typeset by changing the settings. The layout of the main text is consistent with other parts of the thesis.

Note that: Considering the university may change its standards over time, users are not supposed to 100 percent “trust” this template. Even though the template is prepared strictly follow the stipulations of the Graduate School of The University of Hong Kong, this is **not an official** template and we are **not responsible** for any problems of your thesis submission caused by the format, style, typeset, etc of the template. We **strongly suggest** the users to read the latest **Guidelines on Thesis Submission** carefully and adjust the template accordingly to satisfy the stipulations of the university.

An abstract of 341 words

**User-Dissatisfaction-Based Static Bike Repositioning:
Formulations, Solution Methods, and Extensions to Broken
Bikes and On-Site Repair**

by

Runqiu HU

B.Eng.; M.Eng.

A Thesis Submitted in Partial Fulfilment
of the Requirements for the Degree of
Doctor of Philosophy

at

The University of Hong Kong.
June, 2026

Declaration

I, Runqiu HU, declare that this thesis titled, “User-Dissatisfaction-Based Static Bike Repositioning: Formulations, Solution Methods, and Extensions to Broken Bikes and On-Site Repair”, which is submitted in fulfillment of the requirements for the Degree of Doctor of Philosophy, represents my own work except where due acknowledgement have been made. I further declared that it has not been previously included in a thesis, dissertation, or report submitted to this University or to any other institution for a degree, diploma or other qualifications.

List of Symbols

Global notations

I^{SR}	super-resolved light field image	—
I^{LR}	low-resolution light field image	—
I^{HR}	high-resolution light field image	—
E^{SR}	super-resolved epipolar plane image	—
E^{HR}	high-resolution epipolar plane image	—

Chapter 1

θ, ϕ	incoming direction expressed in term of spherical coordinates	rad
τ	time	s (second)
x, y	spatial coordinates with two-plane parameterization	1 (uint)
s, t	angular coordinates with two-plane parameterization	1 (uint)
P	radiance distribution	W/srm ² Hz
Ω	image plane	—
Θ	parameters of the multi-layer framework	—
γ_s, γ_a	scaling factors of spatial / angular coordinates	1 (uint)
$\mathcal{L}$	loss function	—

Chapter 2

F_0	shallow features extracted by a single HConv layer	—
F_{Gd}	feature maps extracted by the d^{th} HRB of the GRLNet	—
H_{HRB}^n	the operation of the n^{th} HRB of the SReNet	—
H_{AGBN}	the operation of the proposed aperture group batch normalization algorithm	—
H_{up}	upsampling operation on the low-resolution features	—
ℓ_A	angular loss	—
ℓ_S	spatial perceptual loss	—

ℓ_{SA}	the weighted combination of ℓ_A and ℓ_S	—
f	the summation of all the feature maps after every activation function of VGG network	—
g	learned mapping between the low-resolution and high-resolution light field images	—

Chapter 3

x, y	spatial coordinates with two-plane parameterization	1 (uint)
s, t	angular coordinates with two-plane parameterization	1 (uint)
γ_s, γ_a	scaling factors of spatial / angular coordinates	1 (uint)
ℓ_G	generator adversarial loss	—
ϕ	denotes the mapping of VGG network	—
δ	nearest neighbor downsampling operator	—
κ	a Gaussian blurring kernel with a window size of 7×7 and standard deviation of 1.2 pixels	—
η	additive noise with zero mean and unit standard deviation	—

CHAPTER 5

EXTENDED-USER-DISSATISFACTION-AWARE CLUSTER-FIRST, ROUTE-SECOND DECOMPOSITION FOR THE STATIC BIKE REPOSITIONING PROBLEM WITH BROKEN BIKES AND ON-SITE REPAIR

5.1 Problem formulation

5.2 EUDF-aware cluster-first, route-second framework

5.3 Extended Activated Transfer Selection

5.4 Hybrid Genetic Search for Extended-UDF Clustering

5.5 Cluster-level planning

5.6 Computational experiments

5.7 Conclusions

CHAPTER 6

CONCLUSIONS AND FUTURE RESEARCH DIRECTIONS

6.1 Summary of main findings

6.2 Contributions of the thesis

6.3 Future research directions

APPENDIX A

About Appendix

The appendix is usually used to provide some supplementary materials for the publications. For example, some experimental results, network architecture, detailed experimental settings or proving of the theories. You can have more than one appendices to provide the materials for different uses.

APPENDIX B

Appendix Title Here

Write your Appendix content here.

APPENDIX C

Appendix Title Here

Write your Appendix content here.
